SERVICE BULLETIN

CERTAINTY: IN CONCRETE

SAFETY FIRST: Always remove keys and lock off power before carrying out any maintenance

HYDRAULIC OIL

Dirty oil causes breakdowns

resulting in premature wearing of pumps and motors preventing the delivery of consistent concrete mixes

Worn components slow down the delivery of concrete

Watch out in hot weather!

Dirty oil can cause overheating

You could be stranded on site

TECH TIP
Always change the hydraulic oil and filters whenever you replace a failed pump, meter or burst hose
